

## New CE-certifier for recreational craft in Finland

**Cview has been authorised by CEproof to CE-certify recreational boats in Finland, Estonia, Latvia and Lithuania. CEproof is a market leading consultancy in CE marking to comply with the EU Directive for Recreational Craft.**

As from September 2008 the Finnish boat-owners, boat manufacturers and importers are able to have their boats CE-marked by the consultant company Cview. Cview has now undertaken approved training and is authorised to conduct surveys, documentation and CE marking of leisure boats.

*-In the first hand we aim at establishing our services on the Finnish market by offering prices that are highly competitive compared to the other service suppliers. One of the contributing reasons for our favourable prices is the unique software system CE-Pro™, developed by CEproof and tailor-made for complex certification processes and to make all documentation more effective, says Jonas Svenblad at Cview.*

*-There is a great demand for this kind of consultant services because the import of leisure boats has increased immensely during the recent years due to weak US dollar, but also because of the upswing of the re-increased boat manufacturing in Finland. Last year the ownership of more than 10-metre-long boats increased by 400 % in Finland, which tells a lot about the present situation, Svenblad points out.*

For import of recreational craft, or building them for sale, it is required that they are CE marked as proof of compliance with the EU Recreational Craft Directive. All boats built for leisure purposes, with a hull length of between 2.5 and 24 metres, are covered by the Directive, and by law they must be CE marked before they are placed into European waters.
